### 1 Check Destination Restrictions

Firstly, you'll need to determine the relevant entry requirements of the destination country. This information can be found via the [Flight Centre Where's Safe to Travel](#) hub, by speaking to your Travel Consultant, or by visiting the [Foreign, Commonwealth & Development Office](#) site.

### 2 Check UK Return Requirements

You'll also need to know the relevant requirements for arriving back in the UK. You may be required to self-isolate on return – this is determined by the colour of your destination country. Broadly speaking, this is as follows:

- Green – no quarantine, but some testing required
- Amber – self-isolation plus testing required
- Red – managed hotel quarantine plus testing required

### 3 Find & Book Testing Providers

You'll need to find a testing provider (see page 6) and book your testing with plenty of time to spare; tests should be booked as early as possible, but administered within the destination country's accepted timeframe (often 72 hours before arrival).

Although rare, inconclusive test results can and do happen, so planning ahead will allow you time to take a re-test if necessary. However, note that re-tests are not permitted in the case of a positive result. Some tests will take longer to process than others so carefully read the information from your test provider.

NHS tests are not permitted for international travel – outbound or inbound.

### 4 Check Airline Boarding Requirements

There may be airline-specific requirements for your trip. This may include uploading your documents to the airline's website for verification, prior to heading to the airport. Many airlines will facilitate this and offer guidance as to which documents you need to prepare before travelling – look for advice and help on their 'Manage My Booking' pages.

A number of airlines are now using verification tools such as the 'VeriFLY' app – chat to your Flight Centre Travel Consultant for more advice.

### 5 It's Time to Fly!

Before heading to the airport ensure that you have the correct documents prepared – this will often mean a type of Passenger Locator Form for the destination country, plus a negative test result or proof of both vaccinations. You should also take this opportunity to re-check current FCDO advice for the destination, as this may have changed.

#### In addition, ensure that:

- Document copies are stored together in one place electronically, and you also have hard copies wherever possible
- The trip to the airport includes contingency time to account for additional verification measures

**Finally: sit back, relax and have a great trip!**

### 1 Find & Book Testing Providers

Passengers travelling to the UK (regardless of country of departure) must have proof of a negative COVID-19 test to travel, even if they have been vaccinated; excluding a very limited list of exemptions. Chat to your expert for full details.

Tests must be taken in the three days before your flight, boat or train bound for the UK departs. The result can be a printed document, an email or text message.

The test can be taken locally or via a kit provided by one of our testing suppliers; it can be a PCR, Lateral Flow, or LAMP test however must meet required performance standards.

### 2 Complete Your Passenger Locator Form

You must complete a [Passenger Locator Form](#) in the 48 hours prior to arrival in the UK. A brief summary of required information includes:

- Your passport details or the travel document you'll use at the UK border
- Your travel details, including times and dates
- Address where you'll stay in the UK
- Booking references for any COVID-19 tests you must take after arriving in the UK
- Invoice number for your quarantine hotel booking, if needed
- If you're using Test-to-Release (see step 3), you'll also need the name of the test provider

### 3 Consider 'Test-to-Release'

Test-to-Release is available in England. This offers arrivals from amber countries the opportunity to end self-isolate on, or after, day five – subject to a negative result. You can either receive a kit in the post or attend a testing site.

According to government rules your Test to Release kit cannot be dispatched by the provider until at least day four. With result turnarounds varying, this could mean that you won't receive your result, and thus your permission to end quarantine, until day seven or day eight. Check the testing provider's details carefully and if you require a speedier turnaround, consider booking a clinic visit with our partner Collinson.

### 4 Adhere to Traffic-Light Rules

On return to the UK you must adhere to the requirements of the traffic-light system, which involves testing and can also include self-isolation or managed quarantine. This is determined by whether your destination country is on the UK's green, amber or red list. Broadly speaking, this is as follows:

- Green – no quarantine, but some testing required
- Amber – self-isolation plus testing required
- Red – managed hotel quarantine plus testing required

### 5 Get set to fly!

As with your outbound journey, ensure you have all your documents in one safe place on your phone, as well as a hard copy to avoid any delays. Have these documents ready to be checked at UK Border.

You should also take this opportunity to re-check current UK traffic light advice for your return, as this may have changed. In addition, we recommend planning more time at the airport than usual, to allow for inspection and verification measures.

**Finally: sit back, relax and have a safe trip home.**

## Pre-Flight Tests

Before departing the UK / before leaving your destination to return to the UK.

In addition to our testing guide we have put together this resource on our official testing partners which will allow you to compare their USPs and select a service which suits your needs.

**Our partners at Randox, Collinson, Qured, DiamondAir and Prenetics offer a variety of services, with specially discounted rates for our customers.**

Furthermore, you will find their websites full of useful information and FAQs surrounding travel testing, so please have a browse.

### **RANDOX**

A large UK&I provider of at-home, airport, and in-clinic testing with the benefit of owning their own diagnostic laboratory to offer services with quick results turnaround. 200+ clinics in UK and Ireland.

#### **USPs**

- Exclusive FCTG discounts
- Wide UK&I clinic coverage
- Cheapest PCR test in the UK, at £43, using the exclusive Flight Centre discount, see above.
- In-clinic testing starting at £85

#### **SUPPORT**

0800 2545 201

[covidcustomersupport@randox.com](mailto:covidcustomersupport@randox.com)

### **COLLINSON**

Airport-testing specialist that provides rapid services.

#### **USPs**

- Exclusive FCTG 20% off discount.
- One of UK's only Test-to-Release services with rapid, same-day results that permit an end to quarantine on day 5 for arrivals from Amber countries. Locations at London airports, East Midlands, Manchester, and London's O2 Arena - just £75 when booked with our discount through FCTG landing page.
- In-terminal, walk through, and drive through options.
- PCR, Lateral Flow, LAMP and Antibody tests offered.
- Rapid LAMP testing in 90-120 minutes suitable for growing number of countries.

#### **SUPPORT**

[consumerhelp@collinsongroup.com](mailto:consumerhelp@collinsongroup.com) plus 24/7 website chat function (re-directs to a human after the initial chatbot questions).

### **QURED**

BA partnered testing supplier.

#### **USPs**

- 10% off with FCTG discount, see above.
- Lateral Flow test kits with supervised video-guidance calls - results within 1 hour. Used for returning to the UK, or departing to a country that accepts lateral flow tests.
- PCR test kits with a Royal Mail 24 hr tracked envelope for returning, or book a courier who waits while you take the test! (within M25).
- Provider of Day 2, Day 8 and Test to Release kits.

#### **SUPPORT**

[support@qured.com](mailto:support@qured.com)

### **PROJECT SCREEN BY PRENETICS**

A large Virgin Atlantic partnered testing provider of testing kits and clinic locations.

#### **USPs**

One of the UKs cheapest lateral flow tests (£26), unsupervised offering flexibility for the customer to administer and upload results at their chosen time. In partnership with Virgin Atlantic offering a website facility to search by destination to show testing requirements.

#### **SUPPORT**
